Notes

1. Because of the unavailability of data, the above figures do not take account of the homeowner exemption and other property tax exemptions. Accounting for these exemptions may alter the above statistics in a small way.
2. Some of the particularly large tax increases or decreases noted above are the result of temporary irregularities, such as the vacancy of a property when it is being rehabilitated.
3. Some condominium buildings have separately deeded parking spaces. As county tax records make it very difficult to distinguish between condominium units and parking spaces, the parking spaces are included in the above analysis. This should not change the basic analysis of the effect of reassessment on condominiums, however, as parking spaces change in value at the same rate as condominium units in a particular building.
